

# ENERGY CASUALTY

Global expertise in energy

COMMERCIAL ADVANTAGE. MUTUAL BENEFIT

**AEGIS London ENERGY CASUALTY**

**AEGIS London has come a long way since its creation in 1999. The company, whose roots lie in energy and a mutual insurance business in the US, operates the AEGIS London syndicate at Lloyd's.**

But AEGIS London covers much more than energy. In just over a decade it has diversified successfully into, among others, international casualty, war and terrorism, property, leisure, contingency and marine cargo – and is recognised as a leader in many of the markets in which it now operates.

This unique background has, in turn, resulted in a different kind of insurer and a different relationship with clients. We are known for being a ‘people’ business, for respecting those we work with – and operating for the mutual benefit of all involved – while resolving claims effectively.

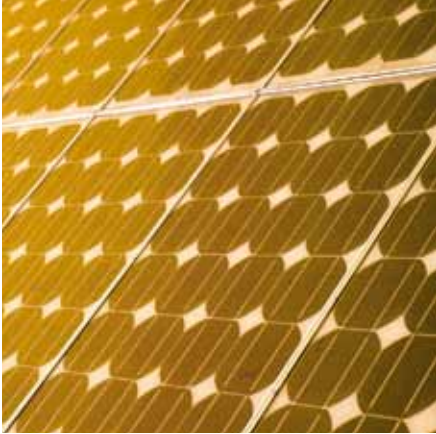

We are proud of our roots and for the past ten years what we’ve done is build on them, striving to bring stability and long-term benefit to our clients while enhancing our reputation for being transparent, responsive and creative. As a company, we make no apologies for being ambitious, always looking for opportunities to bring a new, higher level of technical expertise to everything that we do. This is one of the reasons why clients stick with us.

AEGIS London’s energy casualty team is seen as a market leader in electricity and gas utility insurance cover and in upstream and midstream liabilities in the energy onshore and offshore casualty arena.

Our business is to insure exposures including failure to supply, excess auto, workers’ compensation and employment practices liability, pollution liability and contractors’ and construction liability.

Our US and Canadian clients appreciate our security, stability and consistency – not to mention our strong market leader profile and first class claims handling ability. They also look to us to provide better cover than they might be able to achieve in another market.

In an industry where technical expertise is key, we have a comprehensive understanding of the market – not least because of our heritage. We are also competitively priced through the cycle and have a reputation for fairness and innovation.

This is demonstrated by our ability to develop specific products that provide enhancements for our clients, the most recent being a US renewable energy initiative that places us at the forefront of the market. We are also flexible in being able to write combined lines on placements with onshore and offshore energy exposure.

## **Global expertise in energy**

AEGIS London is a lead market for excess onshore casualty in the US and Canadian utility and energy sectors and offshore energy casualty worldwide.

## **Onshore Energy**

We provide specialist follow form cover for AEGIS Members. For utility Members this is ordinarily excess of the AEGIS and/or EIM layers. Coverage is on a claims made/occurrence notified basis.

In addition, we are market leaders in upstream exploration and production, midstream pipeline, storage and renewable energy business. We underwrite these risks, and those for offshore, on a first excess of loss and above basis.

## **Offshore Energy**

This is a global portfolio with an emphasis on the Gulf of Mexico. We underwrite offshore operators and contractors, construction risks and combined onshore/offshore packages.

Liability products for non-US based energy operations can be found under International Casualty.
