

ENERGY EXPLORATION AND PRODUCTION

Expert lead in a complex class

COMMERCIAL ADVANTAGE. MUTUAL BENEFIT

EXPERIENCED IN ENERGY

AEGIS London ENERGY EXPLORATION AND PRODUCTION

AEGIS London has come a long way since its creation in 1999. The company, whose roots lie in energy and a mutual insurance business in the US, operates the AEGIS London syndicate at Lloyd's.

But AEGIS London covers much more than energy. In just over a decade it has diversified successfully into, among others, international casualty, war and terrorism, property, leisure, contingency and marine cargo – and is recognised as a leader in many of the markets in which it now operates.

This unique background has, in turn, resulted in a different kind of insurer and a different relationship with clients. We are known for being a 'people' business, for respecting those we work with – and operating for the mutual benefit of all involved – while resolving claims effectively.

We are proud of our roots and for the past ten years what we've done is build on them, striving to bring stability and long-term benefit to our clients while enhancing our reputation for being transparent, responsive and creative. As a company, we make no apologies for being ambitious, always looking for opportunities to bring a new, higher level of technical expertise to everything that we do. This is one of the reasons why clients stick with us.

AEGIS London's Energy exploration and production (E&P) team is regarded as a respected lead in this, one of the most complex and challenging business classes. We deal with energy companies from across the world, some private, some public and some state-owned, ranging from the majors to smaller partnerships.

Brokers approach us because of the calibre of our team, the high service levels we provide – and because they know the types of risks to which we can bring our specialist expertise. It is a measure of this respect that we're often asked to lead, even if we don't always take the largest share of the risk on offer.

In turn, we aim to keep our knowledge of the market, of exploration, as current as possible through close contact with the industry, with clients and brokers. In general we deal with clients at CEO or CFO level and foster a relationship where they feel they can question us and gain fast, informative feedback.

Our team has a wealth of experience and expertise in the energy business, through our parent, that is second to none. We don't claim to be the largest outfit in this class but that often works in our favour in terms of the individual attention we can pay to our clients and brokers.

ENERGY EXPLORATION AND PRODUCTION
