## AEGIS London US GENERAL LIABILITY

**AEGIS London has come a long way since its creation in 1999. The company, whose roots lie in energy and a mutual insurance business in the US, operates the AEGIS London syndicate at Lloyd's.**

But AEGIS London covers much more than energy. In just over a decade it has diversified successfully into, among others, international casualty, war and terrorism, property, leisure, contingency and marine cargo – and is recognised as a leader in many of the markets in which it now operates.

This unique background has, in turn, resulted in a different kind of insurer and a different relationship with clients. We are known for being a 'people' business, for respecting those we work with – and operating for the mutual benefit of all involved – while resolving claims effectively.

We are proud of our roots and for the past ten years what we've done is build on them, striving to bring stability and long-term benefit to our clients while enhancing our reputation for being transparent, responsive and creative.

As a company, we make no apologies for being ambitious, always looking for opportunities to bring a new, higher level of technical expertise to everything that we do. This is one of the reasons why clients stick with us.

AEGIS London's US general liability team focuses on two main areas of risk in the continental US: non-marine and onshore energy.

We provide broad-based industrial and commercial non-marine casualty cover in three sub-classes.

First, we offer cover for large commercial and industrial risks, working with Fortune 1000 assureds and others of a similar size. We also cover transportation, including large and small freight railways, transit authority and passenger-related liabilities, and specialist large commercial auto concerns, such as long-haul trucking. Finally, we provide cover for commercial and residential construction business.

All of these lines are written on a lead umbrella and an excess basis by a team with over a hundred years of combined expertise in this sector.

In addition, we are seen as a market leader in electricity and gas utility insurance cover, and in upstream and midstream liabilities in the energy onshore casualty arena.

We offer third party general liability and associated coverages for these and a broad range of midstream activities such as gas transmission, storage and pipeline operations, petrochemical and refining, onshore exploration and production and associated contractors.

Our clients value the intellectual leadership and rigour that we provide in a tough, specialist market which demands prompt claims handling ability and an unrivalled level of underwriting expertise. They appreciate, too, the security of the Lloyd's brand and the professionalism and quality of the claims service provided, along with the flexibility and creativity of the solutions that AEGIS London offers.

AEGIS London is a lead market for US general liability business, focusing on two main areas of risk in the continental US: non-marine casualty and onshore energy.

These lines are written on a lead umbrella and an excess basis.

## **Non-marine casualty**

We offer broad-based industrial and commercial non-marine casualty cover for the following areas:

- Large commercial and general industrial risks (working with Fortune 1000 assureds and others of a similar size)
- Construction (commercial and residential)
- Transportation (large and small freight rail business, transit authority and passenger-related liabilities, and specialist large commercial auto concerns, such as long-haul trucking)

## **Onshore energy**

We write a broad-based onshore energy-related account including:

- Utility and pipeline
- Petrochemical, refining and other midstream risks (including storage, where appropriate)
- Onshore exploration and production and contracting

**COMMERCIAL ADVANTAGE. MUTUAL BENEFIT**
