PLANNING FOR THE FUTURE

AEGIS London UTILITY PROPERTY

AEGIS London has come a long way since its creation in 1999. The company, whose roots lie in energy and a mutual insurance business in the US, operates the AEGIS London syndicate at Lloyd's.

But AEGIS London covers much more than energy. In just over a decade it has diversified successfully into, among others, international casualty, war and terrorism, property, leisure, contingency and marine cargo – and is recognised as a leader in many of the markets in which it now operates.

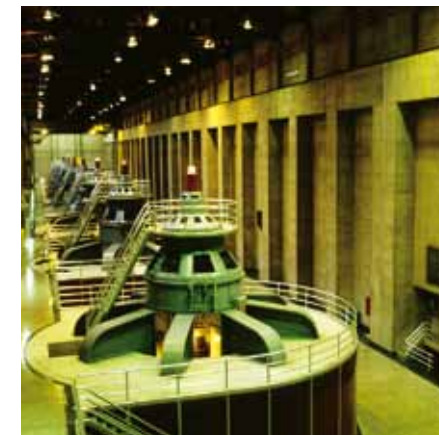

This unique background has, in turn, resulted in a different kind of insurer and a different relationship with clients. We are known for being a 'people' business, for respecting those we work with – and operating for the mutual benefit of all involved – while resolving claims effectively.

We are proud of our roots and for the past ten years what we've done is build on them, striving to bring stability and long-term benefit to our clients while enhancing our reputation for being transparent, responsive and creative. As a company, we make no apologies for being ambitious, always looking for opportunities to bring a new, higher level of technical expertise to everything that we do. This is one of the reasons why clients stick with us.

In this volatile niche market we are recognised as a market leader. It is one where our overarching ambition is to provide technical leadership and depth of understanding to clients who value us for our knowledge of and involvement in their business.

This expertise is built on a wealth of experience and dedication to providing clients with outstanding service. Our clients know they can rely on a depth of technical knowledge in underwriting and claims that is second to none, with breadth and depth on the team (which includes a chartered engineer with many years of power company experience). On their annual meetings in London they can also always be assured of contact with more than one team member to provide continuity.

We pride ourselves on the range of cover we offer, which extends beyond policies for conventional technology to those for nuclear and renewable energy risks. We provide property cover for fire, storms and flood, within an all risks policy covering physical damage, business interruption and machinery breakdown.

Our clients appreciate our ability to service their current needs. We are also planning for the future and the need to keep abreast of changing energy requirements and the impact on clients' needs.
