

**STRUCTURED
SETTLEMENTS
SERVICES**

The AEGIS Structured Settlements CompanySM (TASSCSM) provides structured settlement services to the utility and related energy industries through our alliance with EPS Settlements Group and Mesirow Financial Structured Settlements.

We are dedicated to facilitating prompt claims resolution through the use of structured settlements, and can assist you in finding the structured settlement product best suited to your needs.

The TASSC team combines the extensive capabilities of an independent broker with international reach. We believe that the proper use of structures can eliminate the ongoing management of claims files, saving you time and money.

After helping you and the claimant reach an amicable settlement, we provide flexible benefit plans tailored to the claimant's needs. These plans utilize a selection of life markets rated A+ (XV) or better by A.M. Best Company.

Under the terms of the settlement, the claimant relinquishes the claim against you and agrees to receive future periodic payments from a third party (assignee). The assignee will honor the obligation agreed upon by you and the claimant, funding payments with an annuity purchased from a secure life insurance company.

TASSC's full range of services help resolve claims to your best advantage while satisfying claimants. Our services include:

- Participation in settlement conferences and mediations; on-site professional advice
- Life-care plan analysis
- Access to nationally recognized rehabilitation and medical experts
- Annuity testimony
- Economic report analysis
- Special needs, reversionary medical, 468-B trusts
- US Government Treasury funding vehicles
- Life market annuity funding
- Impaired risk funding

over >>

- Benefit plans tailored to a claimant's individual needs
- Technical support and up-to-the-minute file information
- Distribution of confirmation packages to all parties in the settlement
- Review of settlement and assignment agreements; pre-signing to ensure compliance with life company requirements
